Office Action Summary

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
3. Claims 21-32 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Honda et al.

Honda et al disclose thermoplastic compositions suitable for sealing semiconductive elements (see abstract). These compositions are taught as comprising polyphenylene sulfide, adhesion agent and silica (see column 3 line 37 to column 4, line 31). The composition of the reference are seen as fully meeting applicants claimed physical properties.
